- Extended range with optional laser diode
- Transparent to E1/T1 framing
- Compatible with RAD's DXC cross-connect systems, FCD access units, and Megaplex access multiplexers
- ITU standards compliant

The FOM-E1/T1 fiber optic modem converts E1/T1 electrical signals into optical signals for transmission over fiber optic cables to extend the E1/T1 service range of up to 144 km (89.4 miles).

FOM-E1/T1 features various optical interfaces:

- 850 nm for multimode fiber
- 1310 nm for multimode fiber
- 1310 nm for single-mode fiber
- 1550 nm for extended range over single-mode fiber.

## E1/T1 Fiber Optic Modem

FOM-E1/T1 operation complies with ITU G.703 and G.955 standards.

An alarm relay port transmits the following alarm conditions:

- Major alarm – Low level of E1/T1 electrical input or high bit error rate at the fiber optic interface
- Minor alarm – AIS received at electrical or fiber optic interface.

Front panel LEDs indicate system faults in the electrical and fiber optic circuits.

The modem features local and remote loopbacks.

FOM-E1/T1 is also available as a plug-in card for RAD's 19-inch modem rack, ASM-MN-214.
